## +++ WEISS advances the digitalization for medium-sized companies +++

**The wide range of tools and methods available for digitalization is increasing at a rapid pace. The greatest challenge, especially for medium-sized machine and plant manufacturers, lies in selecting the right processes and methods and implementing them. With its “Triple M – Mission for medium-sized machine manufacturers” series, WEISS has created a platform to bring together component manufacturers, plant manufacturers and operators, and software specialists from the field of virtual engineering and commissioning where they can share experience and expertise. The next meeting of the panel of experts will be held in Stuttgart, Germany during the Motek trade show.**

The machine manufacturing industry is in a state of change. The need for the industry to make business processes more efficient is a constant reality. Holistic quality and productivity in manufacturing has already reached peak levels given measures geared towards avoiding downtime, shortening tooling times, route optimization, and the introduction of methods such as 5S and 8D. Digital services are now opening up new opportunities for reducing further waste factors such as startup and commissioning times. Here, digital transformation extends much further than production processes alone. Virtual solutions are taking hold in the mechanical engineering industry – from contacting customers to engineering and supplier management to recruiting employees.

### **Triple M provides security**

Mid-size companies have been coming together as part of the Triple M experience exchange, first initiated by WEISS in March 2022 in Munich, Germany. The participants discussed not only expectations, goals, and approaches, but also the weaknesses of the digital transformation regarding machine and plant manufacturing. Among the participants were well-known companies from the industry such as ISG Industrielle Steuerungstechnik GmbH, go2automation, BBS Automation GmbH, Gluth Systemtechnik GmbH, HEITEC AG, and Lyric Automation Germany GmbH. The second Triple M meeting will be held at ISG in Stuttgart during the Motek trade show to further intensify the experience and expertise exchange.

## Digitalization out of the WEISS WORLD

Within the WEISS WORLD, the specialist for rotary indexing tables and automation systems is advancing its own transformation. Internal processes are being mapped and executed digitally at an ever-increasing rate. The activities span all business areas and processes – from internal operations all the way to digital services, which supplement the product portfolio. WEISS sees itself as a partner for its customers on the way to digital transformation. WEISS WORLD opens up opportunities and perspectives for them to increase added value with digital services such as digital engineering.

## About WEISS

With its automation solutions, WEISS GmbH is one of the world's leading system suppliers in the automotive industry, machine and plant manufacturing, life science, and electronics. The reliable and durable rotary indexing tables, handling units, delta robots, and linear transfer systems are making the industrial production of tomorrow a reality. With its expertise in mechanical, mechatronic, and digital solutions, WEISS paves the way for industrial transformation. By applying their engineering expertise, knowledge of industries and processes, and high affinity for serving customers, the experts assist system integrators and producers in designing and operating innovative and sustainable production plants. The family-owned company with headquarters in the city of Buchen in Germany's Rhine-Neckar metropolitan area, operates on a global scale. Founded in 1967, WEISS now has a staff of around 550 employees in its sales, service, and manufacturing locations in 47 countries.
